

I am a trucking company owner operator. When the World Trade Center and Pentagon was attacked by terrorists

I was unable to stay informed on the news because XM Radio Was not available at the time . I Now am a subscriber and would be very displeased if XM Radio were to be limited on the type of information it could provide me in the future.

XM Radio Provides me uninterrupted information no matter where I am, and is useful in preplanning my trip for safe and efficient travel to the various cities I travel to, And allows me to avoid traffic situations that could be hazardous to the general public.

If I were a HAZMAT carrier that would be good thing

I am a voter registered in my jurisdiction and would be most displeased if any of my representatives were to vote to limit the information I paid to receive.
